## FINANCIAL REPORT

The financial statements are based on the following principles:

- Standards of GRAP – which are GRAP 1, GRAP 2 and GRAP 3 and the 8 GAMAP standards;
- The new budget formats prescribed by National Treasury; and
- The Municipal Finance Management Act.

In terms of Government Gazette number 26511 dated 1 July 2004, the date of implementation of the new accounting standards in local government varies according to the capacity classification of municipalities listed in the Gazette.

Steve Tshwete Local Municipality, as a high capacity municipality, must fully implement the new accounting standards (GRAP) as from 1 July 2005 in order to prepare new standards compliant annual financial statements for the financial year end 2005/2006 and onwards.

Significant progress has been made towards full implementation of the new accounting standards and the final transformation process will be completed in the next financial year to 30 June 2006.

The operational results achieved for the past financial year are extremely favourable as per the Statement of Financial Performance with a surplus for the year amounts to R46 854 395. This is mainly due to the implementation of the new accounting standards. Various transactions, which were previously accounted for under appropriations, are now either recognized as revenue or as expenditure.

Should these transactions be taken into consideration, the actual budgeted surplus for year is R19 581 704, which represents a budget deviation of 4,89%.

The following is a reconciliation of the surplus for the year in the Statement of Financial Performance to the actual budgeted surplus:

▪ Surplus/(deficit) for the year	R	46 854 395
▪ Other adjustments as recognized in the Statement of Changes in Net Assets:		
- Less Capital Replacement Reserve	R	(30 70817)
- Plus Capitalization Reserve	R	16 761 460
- Plus Government Grant Reserve & Public Contributions	R	8 434 572

- Less	Insurance Reserve	R	(111 800)
- Less	Housing Development Fund	R	(21 642)
	<b>Sub-Total</b>	<b>R</b>	<b>41 208 878</b>
- Less	Capital Government Grants and Subsidies	R	(9 405 061)
- Less	Public Contributions and donated property, plant and equipment recognized as revenue	R	(16 154 589)
▪	Additional Appropriations recognized as income:		
- Less	Surplus stock	R	(94 485)
- Less	Interest received – Zero Bond Investments	R	(3 473 375)
▪	Additional Appropriations recognized as expenditure:		
- Plus	Stock losses	R	177 464
- Plus	Leave provision	R	791 200
- Plus	Provision for bad debt	R	3 058 298
- Plus	Additional contribution: Capital Replacement Reserve	R	3 473 475
	<b>Actual budgeted surplus</b>	<b>R</b>	<b>19 581 704</b>

The budget deviation can amongst others be attributed to a favourable deviation in revenue to the amount of R5,3-million and expenditure to the amount of R11,7-million for the following segments:

	<b>Budget 2004/2005</b>	<b>Actual 2004/2005</b>	<b>% Deviation</b>
▪ Interest Earned – External Investments Due to increase in available cash, more investments were made	9 680 000	11 993 724	23,90%
▪ Other Revenue Higher income was received from the coal reserves than budgeted	25 259 937	28 244 139	11,81%
▪ Employee Related Cost Mainly the result of personnel turn over during the year	102 759 327	100 293 791	2,40%
▪ General Expenditure Savings have realized on transport and travelling costs as well as consultancies fees and the cleanest town campaign	41 590 153	38 432 796	8,22%
▪ Repairs and Maintenance During the year less maintenance	17 305 584	15 879 782	8,24%

was required on buildings,  
machinery and equipment as well  
as networks

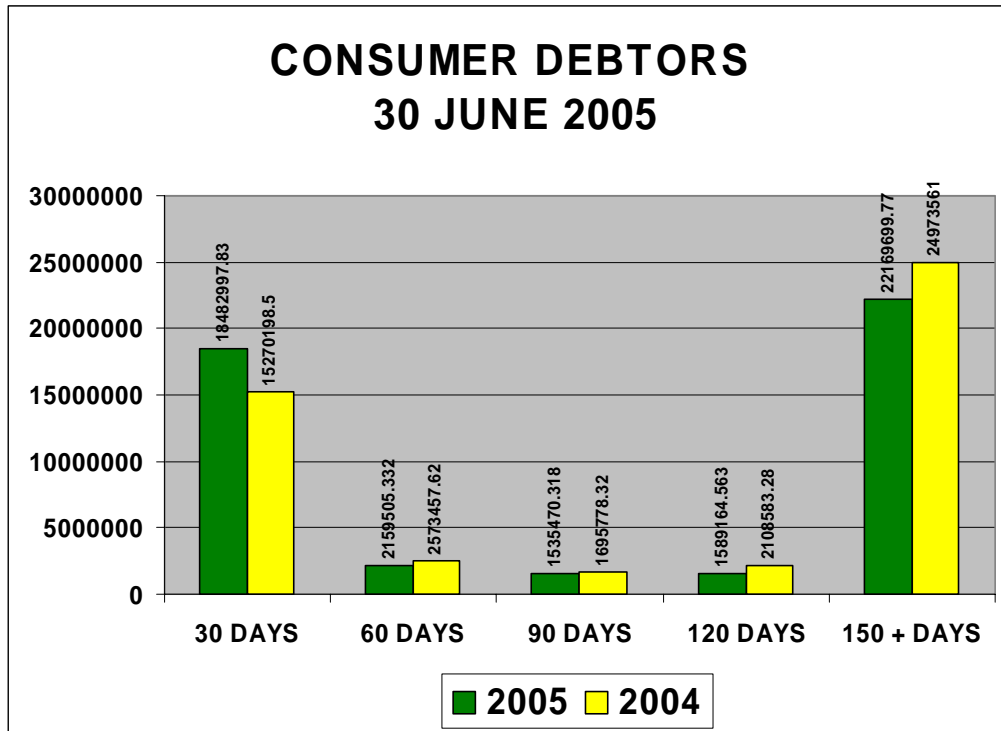

- |                  |            |            |       |
|------------------|------------|------------|-------|
| ▪ Bulk Purchases | 59 235 460 | 57 757 247 | 2,50% |
|------------------|------------|------------|-------|
- Mostly due to lower consumption  
levels

Operating income for the year is R338,2-million which is 29,78% more than the previous year and includes operating government grants to the amount of R23,9-million and capital grants received to the amount of R25,5-million. The operating expenditure for the year is R291,3-million which is 18,08% higher than the 2003/2004 financial year.

An additional contribution had been made to the bad debt provision to the amount of R3 058 298 to supplement the provision for outstanding debt exceeding 150 days.

During January Council approved a once-off incentive for all residential consumers of the full spectrum of municipal services who are in arrears to either settle their outstanding accounts in full or alternatively be compelled to enlist under the indigent support and free basic services. One of the conditions of this incentive was that all arrear debts up to the date of enlistment will be written off as irrecoverable. Under this incentive bad debts to the amount of R8 607 862 were written off as irrecoverable.

Although consumer debtors has increased slightly from R21,6-million to R23,7-million the main increase is on current debtors which can graphically be presented as follows:

The distribution loss for electricity has stabilized and slightly decreased to 9,36% (2004: 9,73%). The unfavourable increase in water losses from 17,16% to 20,65% is of great concern. Although this remains well below respective industry norms, the increased trend experienced must be investigated and the necessary preventive measures be implemented to reduce these losses and potential income for Council.

Cash and short term investments increased by a significant 43,02% to R172,6-million (2004: 24,14% R97,2-million) over the past financial year. This is mainly the result of the strong operating performance and high collection rates for the year of 99,02% (2004: 102%).

The high collection rates are indicative of the strong credit control measures implemented by Council. The collection period amounted to a very healthy 33 days (2004: 37 days) with a debtors turnover rate of 10,34% (2004: 10,36%) which is in line with the accepted norms.

This can be graphically presented as follows:

Long term investments to the amount of R46,8-million (2004: R43,3-million) remain in place to redeem certain external loans which amounts to R36,2-million at the end of the 2005/2006 financial year.

A new fifteen (15) year loan from INCA of R30-million has been raised in the past financial year. This loan is intended to finance new capital infrastructural projects. Loans totaling R8,2-million were redeemed whilst the total debt increased to R139,5-million (2004: R117,7-million).

Total debt to total income decreased to 41,26% from 45,18% previously, mainly due to the higher income which was recognized in the 2004/2005 financial year as in the 2003/2004 financial year.

More information regarding external loans and investments are disclosed in Notes 4 and 11 and Appendix A.

Net capital expenditure for the year amounts to R68,6-million which is notably 14,72% higher than the previous financial year (R59,8-million). During the year R42 867 029 was spent from own funds and R9 836 818 from government grants and R15 965 186 from the Nkangala District Municipality. Assets with a carrying value of R327 651 were disposed of during the year.

The actual capital expenditure incurred is 84,50% of the budgeted amount and excludes projects from the Nkangala District Municipality as the responsibility for the completion of those projects is beyond Council's control.

Consideration should be given to the roll-over projects to the amount of R6,8- million (10,98%) and considerable savings to the amount of R1,9-million (3,13%). Taking these amounts into consideration the percentage is then 98,61% which means that only six (6) projects to the amount of R870 000 were not executed during the financial year.

The above graph excludes Nkangala District Municipality capital projects.

The deviations on the operating and capital budget are explained in more detail in Appendices E and F.

In general Council has maintained a strong liquidity profile in the past financial year, with collection levels well above average. The financial position of Council remains healthy and we will continue to achieve this standard.

### **Acknowledgement**

During the year under review my department and me received valuable support and guidance from the Executive Mayor and Members of her Committee, Municipal Manager, the other Managers and Heads of Departments. Their invaluable co-operation is dearly appreciated.

All the officials in my department provided me with loyal assistance and expressed exceptional competency without which I would not have been able to produce this report.

To all I wish to express my sincere appreciation.

**F.J. NAUDÉ (F.I.M.F.O.)  
MANAGER : FINANCE**

## **ACCOUNTING POLICY**

### **1. OBJECTIVE**

The objective of the annual financial statements is to be a source of information on the financial position, performance and changes in financial status of the Steve Tshwete Local Municipality and demonstrates accountability useful to a wide range of users in making economic or political decisions.

### **2. BASIS OF PRESENTATION**

- 2.1 These annual financial statements have been prepared in accordance with Generally Accepted Municipal Accounting Practices (GAMAP) and Generally Recognised Accounting Practice (GRAP) with the exception of the Town Development Suspense Accounts and Land Trust Fund, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003). These accounting policies are consistent with those of the previous financial year.
- 2.2 The financial statements have been prepared on the historical cost basis.
- 2.3 Statements are also prepared on the accrual basis of accounting. Under this basis the effects of transactions and other events are recognised when they occur and are recorded in the financial statements within the period to which they relate.
- 2.4 Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a standard of GAMAP or GRAP.
- 2.5 The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

### 3. **GOING CONCERN ASSUMPTION**

These annual financial statements have been prepared on a going concern basis.

### 4. **HOUSING DEVELOPMENT FUND**

The Housing Development Fund was established in terms of the Housing Act, Act 107 of 1997. Loans from national and provincial government used to finance housing developments undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund are used to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

### 5. **RESERVES**

#### 5.1 **Capital Replacement Reserve (CRR)**

The purpose of the CRR is to set aside cash to provide infrastructure and other items of property, plant and equipment from internal sources. All cash received from the Council's coal reserves and interest received on external investments are being transferred to the CRR account. The cash is transferred to a designated CRR account and can only be used to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilized. The amount transferred to the CRR is based on the municipality's need to finance future capital projects included in the Integrated Development Plan.

#### 5.2 **Capitalization Reserve**

On the implementation of GAMAP/GRAP, the balance on certain funds, created in terms of the various Provincial Ordinances applicable at the time, that had historically been utilized for the acquisition of items of property, plant and equipment have been transferred to a Capitalization Reserve instead of the accumulated surplus/(deficit) in terms of a directive (budget circular) issued by National Treasury.

The purpose of this Reserve is to promote consumer equity by ensuring that the future depreciation expenses that will be incurred over the useful lives of these items of property, plant and equipment are offset by transfers from this reserve to the accumulated surplus/(deficit). The balance on the Capitalization Reserve equals the carrying value of the items of property, plant and equipment financed from the former legislated funds. When items of property, plant and equipment are depreciated, a transfer is made from the Capitalization Reserve to the accumulated surplus/(deficit).

When an item of property, plant and equipment is disposed, the balance in the Capitalization Reserve relating to such item is transferred to the accumulated surplus/(deficit).

### **5.3 Government Grant Reserve**

When items of property, plant and equipment are financed from government grants, a transfer is made from the accumulated surplus/(deficit) to the Government Grants Reserve equal to the Government Grant recorded as revenue in the Statement of Financial Performance in accordance with a directive (budget circular) issued by National Treasury. When such items of property, plant and equipment are depreciated, a transfer is made from the Government Grant Reserve to the accumulated surplus/(deficit).

The purpose of this policy is to promote community equity by ensuring that the future depreciation expenses that will be incurred over the useful lives of government grant funded items of property, plant and equipment are offset by transfers from this reserve to the accumulated surplus/(deficit).

When an item of property, plant and equipment financed from government grants is disposed, the balance in the Government Grant Reserve relating to such item is transferred to the accumulated surplus/(deficit).

### **5.4 Donations and Public Contributions Reserve**

When items of property, plant and equipment are financed from public contributions and donations, a transfer is made from the accumulated surplus/(deficit) to the Donations and Public Contributions Reserve equal to the donations and public contributions recorded as revenue in the Statement of

Financial Performance in accordance with a directive (budget circular) issued by National Treasury.

When such items of property, plant and equipment are depreciated, a transfer is made from the Donations and Public Contributions Reserve to the accumulated surplus/ (deficit).

The purpose of this policy is to promote community equity and facilitate budgetary control by ensuring that sufficient funds are set aside to offset the future depreciation charges that will be incurred over the estimated useful life of the item of property, plant and equipment financed from donations and public contributions.

When an item of property, plant and equipment financed from government grants is disposed, the balance in the Donations and Public Contributions Reserve relating to such item is transferred to the accumulated surplus/(deficit).

#### **5.5 Self-Insurance Reserve**

The municipality has a Self-Insurance Reserve to set aside amounts to offset potential losses or claims that cannot be insured externally (adopt to specific circumstances).

The Self-Insurance Reserve is maintained to provide for non-claimable losses as well as for motor vehicle claims until aggregated excess payment to the amount of R200 000 per annum is reached.

The Self-Insurance Reserve for electricity is mainly used for theft of distribution networks and cables, which are uncovered items in terms of the insurance contract of Council.

Insurance premiums are charged out to the respective services and departments in accordance with the insured value of assets.

### **6. PROPERTY, PLANT & EQUIPMENT**

An item of property, plant and equipment is recognised in the financial statements as an asset when:

- it is a resource controlled by a municipality;
- as a result of past events;

- from which future economic benefits or potential service provision is expected to flow to the municipality; and
- the cost of the asset to the municipality can be measured reliably.

Property, plant and equipment is stated at historical cost, less accumulated depreciation. Such assets are financed either by external loans, capital replacement reserve, government grants and subsidies and donations.

Heritage assets which are of culturally significant resources are shown at cost and are not depreciated owing to the uncertainty regarding their estimated useful lives. Similarly, land is not depreciated as it is deemed to have an indefinite life.

The cost of an item of property, plant and equipment acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets was measured at its fair value. If the acquired item could not be measured at its fair value, its cost was measured at the carrying amount of the asset given up. Subsequent expenditure is capitalized when the recognition and measurement criteria of an asset are met.

Depreciation is calculated on cost, using the straight-line method over the useful lives of the asset. Assets will be depreciated according to their annual depreciation rates as prescribed in the Asset Management Policy under point 7.6

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the statement of financial performance.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognized in the statement of financial performance.

## **7. INVESTMENTS**

Investments which include listed government bonds, unlisted municipal bonds, fixed deposits and short term deposits invested in registered banks are stated at cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss and this is recognised as an expense in the period that the impairment is identified.

Surplus funds are invested in terms of Council's Investment Policy. Investments are only made with financial institutions registered in terms of the Deposit Taking Institutions Act of 1990 with an A1 or similar rating for safe investment purposes.

The investment period should be such that it will not be necessary to borrow funds against the investments at a penalty interest rate to meet commitments.

## 8. **LEASES**

Leases are classified as finance leases where substantially all the risk and rewards associated with ownership of an asset are transferred to the municipality.

Property, plant and equipment subjected to finance lease agreements are capitalised at their cost equivalent and the corresponding liabilities are raised.

The cost of the item of property, plant and equipment is depreciated at appropriate rates on the straight-line basis over its estimated useful life.

Lease payments are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are expensed as they become due.

## 9. **INVENTORIES**

Consumable stores, raw materials, work in progress and finished goods are valued at the lower of cost and net realisable value. In general, the basis of determining cost is the weighted average cost method.

Redundant and slow-moving stock are identified and written down with regard to their estimated economic or realisable values and sold by public auction. Consumables are written down with regard to age, condition and utility.

10. **TRADE CREDITORS**

Trade creditors are stated at their nominal value

11. **REVENUE RECOGNITION**

Revenue from rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Interest on unpaid rates is recognised on a time proportion basis.

The Steve Tshwete Local Municipality uses a differentiated site value assessment rate system. According to this assessment rates are levied on the land value of properties and rebates are granted according to the usage of a particular property.

Rebates are respectively granted, to owners of land on which not more than two dwelling units are erected provided that such dwelling units are solely used for residential purposes. Additional relief is granted to needy, aged and/or disabled owners, based on income and age. Assessment rates income is recognised once a rates account has been issued to ratepayers. Adjustments or interim rates are recognised once the municipal valuer has valued the change to properties.

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumptions are made monthly when meter readings have not been performed and are recognized as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. Revenue from the sale of electricity prepaid meter credit are recognised at the point of sale.

Service charges relating to refuse removal are recognized on a monthly basis by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage and are levied monthly based on the number of refuse containers on each property, regardless of whether or not containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

Revenue arising from the application of the approved sundry tariff charges is generally recognised when the relevant service is rendered. This includes the issuing of licenses and permits. Interest and rentals are recognised on a time proportion basis.

Revenue from fines is recognised when payment is received and the revenue from the issuing of summonses is recognised when collected.

Income from agency services is recognized on a monthly basis once the income collected on behalf of agents has been quantified.

Government grants and donors are recognised as revenue when all conditions with the grant have been met. Where grants have been received but the conditions are not met, a liability is raised.

Donations are recognized on a cash receipt basis or where the donation is in the form of property, plant and equipment are brought into use.

Contributed property, plant and equipment is recognized when such items of property, plant and equipment are brought into use.

Revenue from the recovery of unauthorized irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act 56 of 2003) and is recognized when the recovery thereof from the responsible councillors or officials is virtually certain.

## 12. **PROVISIONS**

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made.

Provisions are reviewed at reporting sheet date and adjusted to reflect the current best estimate.

13. **PROVISION FOR BAD DEBT (accounts receivable)**

An annual contribution is made towards a working capital provision for non-recoverable rates and service fees.

The balance of the provision of bad debt is reviewed at balance sheet date and adjusted to be equal to all debt outstanding for more than 150 days.

When an under recovery occurs during the year an additional contribution is made from the accumulated surplus at year-end.

Bad debts are written off during the year in which they are identified.

14. **CASH AND CASH EQUIVALENTS**

Cash includes cash on hand and cash with banks. Cash equivalents are short-term investments that are held with registered banking institutions with maturities of three months or less.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts.

15. **UNAUTHORIZED EXPENDITURE**

Unauthorized expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act 56 of 2003). Unauthorized expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

16. **IRREGULAR EXPENDITURE**

Irregular expenditure is expenditure that is contrary to the Municipal Finance Act (Act 56 of 2003), the Municipal Systems Act (Act 32 of 2000), the Public Office Bearers Act (Act 20 of 1998) or is in contravention of the municipality's supply chain management policy.

Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

17. **FRUITLESS AND WASTEFUL EXPENDITURE**

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

18. **COMPARATIVE INFORMATION**

Budgeted amounts have been included in the annual financial statements for the current financial year only.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are reclassified. The nature and reason for the reclassification is disclosed.

19. **RETIREMENT BENEFITS**

The municipality provides retirement benefits to its employees and councillors contribute to the under-mentioned pension funds:

- Joint Municipal Pension Fund
- Municipal Employees Pension Fund
- Municipal Gratuity Fund
- SALA Pension Fund

Councillors are members of the Municipal Councillor's Pension Fund that was established in terms of the Remuneration of Public Office Bearers Act 1998 (Act 20 of 1998).

The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

20. **SEGMENTAL INFORMATION**

Segmental information on property, plant and equipment as well as income and expenditure is set out in Appendix B to E based on the international government financial statistics classifications and the budget reform formats as prescribed by National Treasury.

21. **BORROWING COSTS**

Borrowing costs are recognized as an expense in the Statement of Financial Performance.

22. **HANDLING OF ADMINISTRATIVE AND OTHER OVERHEAD CHARGES**

The costs of internal support services are transferred to the different services in accordance with Council's policy on activity based costing.

23. **SURPLUSES AND DEFICITS**

Surpluses and deficits arising from the operations of Electricity, Water and Sewerage Services are carried over to the Rates and General Services.

24. **CONSUMER DEPOSITS**

All consumers are required to pay a deposit equal to two months consumption of electricity and water services. Deposits are considered a liability as the deposit is only refunded once the service is terminated. No interest is paid on deposits.

Refer to Appendices B and C for more detail.

The amount for capital under construction mostly relates to assets that still need to be capitalized once the old Township Development Suspense and Land Trust Fund accounts are finally unbundled.

With the capitalization of these assets the amount of capital under construction will reduce the balance of the Capital Replacement Reserve.

#### ***Motor car loans***

Senior personnel were entitled to car loans which attract interest at 8,5% per annum and which are repayable over a maximum period of 5 years. In terms of the MFMA no new loans are granted and the existing loans will be repaid by the year 2009.

#### ***Engineering services loans***

Loans are made to encourage property owners to connect to the reticulation system. These loans attract interest at prime rate per annum and are repayable over a maximum period of one year.

#### ***Housing selling scheme loans***

Housing loans are granted to qualifying individuals in terms of the Housing Act. These loans attract differentiated interest rates and are repayable over 20 years. No new loans are granted and existing loans will continue until repaid.

#### ***Sale of erven***

Loans were given at a low interest rate of 7,5% per annum repayable over 4 years to encourage development through the sale of vacant erven. In terms of the MFMA no new loans are granted.
